

The background of the entire image features a light blue-grey color with faint, stylized grey outlines of tree branches and leaves. On the left side, there is a prominent orange line-art graphic of a single leaf, oriented vertically with its tip pointing upwards.

The Woodlands Collection

SOLID HARDWOOD TIMBER FLOORING

BY HURFORD'S

Brought together to share the diversity of Australian hardwood species, in one of Hurford's most loved flooring collections.

A Solid Hardwood Floor is an investment for a lifetime. It not only adds value to your home but makes a high-end style statement all on its own.

Your Forever Floor

SYDNEY BLUE GUM

Eucalyptus saligna

A popular species for its beautiful colour, straight grains, strong and hard natural attributes. Making it sought after for both domestic and commercial flooring projects.

BRUSHBOX

Lophostemon confertus

Brings warmth, displays appealing features and matches well with modern elegant spaces. Brush Box has an even texture with very tight interlocking grain.

TURPENTINE

Syncarpia glomulifera

With beautiful deep chocolate reddish brown colouring, Turpentine is a floor that matches well with contemporary interior styling.

GREY IRONBARK

Eucalyptus paniculata

Offering a large variety of colour from dark chocolate to nutty honey with some dark reddish brown. Recognised as an extremely hardwearing timber, perfect for high traffic areas.

**NEW ENGLAND
BLACKBUTT**

Eucalyptus andrewsii

Straight grained timber with a warm nutty hue which will compliment a range of interior designs where a lighter neutral palette is required.

SILVERTOP

Eucalyptus laevopinea

Being a contemporary neutral colour, Silvertop compliments well with a large variety of modern interior decors.

Thermally Enhanced Hardwood

Permanently altering the look to create a deeper richer, more intense hue of Australian Hardwood.

With the knowledge and skill acquired from the ten years of thermally modifying Australian Hardwood, Hurford's has now developed a process known as Thermally Enhanced Hardwood.

This process uses a unique temperature schedule through the drying process to create a colour palette that reflects the more traditional tones in the species, altering the blush lightness of Sydney Blue Gum to a more timeless deep scarlet intensity.

Another advantage of Thermally Enhanced Hardwood is the transformation of the traditional lighter sapwood to a more natural and attractive warm undertone.

**THERMALLY ENHANCED

SPOTTED GUM**

Hurford Roasted is about creating a luxurious style when it comes to Australian hardwood flooring.

The Hurford Roasted process metamorphosis the natural colour of hardwood to create a deep rich tone that penetrates through the wood.

Available in two distinctive tones:

Peat: a natural dark earth hue.

Cayenne: an intimate reddish bronze palette.

Hurford Roasted is a high temperature thermally modified hardwood that uses a custom designed heating program to alter the woods molecular structure. This has many benefits that include locking in the colour, increasing the durability and limiting movement to a fraction of normal kiln dried flooring.
